COURSE DESCRIPTION

Introduction to the basic concepts, theories, applications, and practice of interior design; as well as the development of technical skills and design methodologies through several design exercises and project. Emphasis of the course is on understanding both how building interiors are experienced by its users, and the relationship between the built and natural environments.

COURSE CONTENTS

Lectures; Discussions
Exercises
Projects
Technical drawing; Model-making

CLASS FORMAT

The foundational knowledge of design and interior design will be introduced in the first part of the semester. There will be semester-long design project, along with several design exercises during the course of the semester. Weekly exercises will be provided for you to build on the understanding and the skills you are developing. Those exercises build upon one another. This means that missing a class or a failure to submit the required task on time will set you back an entire week and will make your journey very difficult to catch up. A semester-long design project will be introduced halfway through the semester which will help you integrating fundamental theories, concepts, and technical knowledge of interior design. There will be incremental progress exercises in the project development. Desk crits (individual meeting), collaboration, the exchange of ideas and feedback from peers will be invaluable to your learning progress, and will also help you to develop critical thinking skills in solving design problems.

COURSE LEARNING OUTCOMES

Students should be familiar with the scope of the profession and what is entailed in the field of Interior Design. [CIDA standards 4, 5, 6, 7, 8, 9, 16] [PLO 1, 2, 3, 4, 5] - EMERGING

Critical Thinking
 Students should exercise basic critical thinking/analytical skills and begin to develop public speaking/self-expression skills. [CIDA standards 4, 8, 9] [PLO 2] - EMERGING

- willingness to experiment and to challenge yourself
- professional demeanor

Each individual has own voice and perspective which makes them unique; the goal of your design education is to recognize and cultivate that individual voice and broaden your perspective. While value is placed on original and autonomous thought, you are encouraged to work with others as much as possible and share ideas. The collaborative process will help to strengthen your work far more than by working alone.

GRADING
 Your final grade will be weighted as follows:

Exercises	45%	}	= 100
Project	45%		
Participation	10%		

This is a demanding and challenging course, and requires complete commitment. Should you have to miss a class, please inform the instructor in advance when possible; in any case, you will be responsible to make up any missed work on your own. Please make arrangements with one of your classmates to review what was missed in class; do not expect the instructor to repeat the lecture or make special accommodations due to absence. All exercises and project must be complete and submitted on time, unless otherwise arranged in advance. Any unexcused late submissions will be marked down by one letter grade. Any assignments submitted over one week late will not be accepted. In the event of three unexcused absences or three unexcused tardies your course grade will be lowered by one letter grade.

DESIGN METHODOLOGY

Design methodology is comprised of the methods, tools, and processes you use to develop a design solution. There is no such thing as a single or "right" design methodology; design is an iterative process, and each person has to develop his/her own approach. Therefore, the more you experiment, the more likely you will find what works for you. In this class, you will be exposed to a variety of methods and approaches which will help you to formulate your own.

Keep in mind that the creative process is neither linear nor sequential; there is no such thing as a correct or final solution; thus some of your projects will be more or less resolved than others. Design is not a finite process but rather an on-going one which continually progresses. The emphasis in this course should be on exploration. It is important to take risks and not to be afraid to make mistakes—sometimes the most promising ideas raise more questions than solve them.

DESIGN SKETCH JOURNAL

Each student is expected to maintain a sketch journal throughout the course of the semester and beyond. The journal has several functions:

- ...to learn to conceptualize and communicate ideas through visual language (diagrammatic representation)
- ...to record your ideas, thoughts, reflections and speculations about design
- ...to document your process as well as progress in your design education
- ...to develop your drawing skills
- ...to experiment with other representation techniques
- ...to synthesize (create) and analyze (critique)
- ...to collect and gather information

A sketchbook does not imply sketching only. Use it to experiment with a variety of drawing techniques, ranging from 30-second gesture sketches to hour-long renderings. Work with different media as well; for example: color pencil, watercolor, ink, collage, photo montage, etc. Don't be concerned solely with making drawings that look good; simply produce. Be spontaneous without evaluating the merit or relevance of your entries.

Your journal is a visual and textual narrative of your process and development, and as such will not be submitted as a finished work. As this is a personal tool there are no requirements as to the format or type of instruments you use, but the quality of the paper should be good (lined notebook paper is not acceptable). You should have your journal in your possession at all times and entries should be made on a regular, if not daily, basis.

Connection to the Characteristics of a Marianist Education

The following are characteristics of the approach to education engaged at Marianist schools, including Chaminade University:

- Educate for formation in faith:
 - Trust in yourself and your instructor to do a good job to the best ability.
- Provide an integral quality education
 - Interactive learning between students and an instructor and students and students is a key for the success of digesting the information.
 - Proactive attitude towards learning is important.
- Educate in family spirit
 - Success can be achieved by harnessing everyone's growth together
- Educate for service, justice and peace
 - Be mindful of how your design may impact users, occupants and the environment
- Educate for adaptation and change
 - As people grow and change, space needs to respond to the changes of people, environment and society.

Native Hawaiian Values

Education is an integral value in both Marianist and Native Hawaiian culture. Both recognize the transformative effect of a well-rounded, value-centered education on society, particularly in seeking justice for the marginalized, the forgotten, and the oppressed, always with an eye toward God (Ke Akua). This is reflected in the 'Ōlelo No'eau (Hawaiian proverbs) and Marianist core beliefs:

1. Educate for Formation in Faith (Mana) E ola au i ke akua ('Ōlelo No'eau 364) May I live by God.
2. Provide an Integral, Quality Education (Na'auao) Lawe i ka ma'alea a kū'ono'ono ('Ōlelo No'eau 1957) Acquire skill and make it deep.
3. Educate in Family Spirit ('Ohana) 'Ike aku, 'ike mai, kōkua aku kōkua mai; pela iho la ka nohana 'ohana ('Ōlelo No'eau 1200) Recognize others, be recognized, help others, be helped; such is a family relationship.
4. Educate for Service, Justice and Peace (Aloha) Ka lama kū o ka no'eau ('Ōlelo No'eau 1430) Education is the standing torch of wisdom.
5. Educate for Adaptation and Change (Aina) 'A'ohe pau ka 'ike i ka hālau ho'okahi ('Ōlelo No'eau 203) All knowledge is not taught in the same school
