## Course Description & Materials

#### **Catalog Course Description**

This course provides an examination of the broad aims of education through the inquiry approach to the sciences, including physical science, botany, zoology, earth elements, geography, and history. Emphasis is on writing a science-based curriculum that unfolds throughout all the content areas and that is developmentally and culturally appropriate, and on preparing learning center materials. Current research is examined. Prerequisites: ED 220, ED 320, ED 321, ED 322, ED 323, ED 324, ED 325, and ED 326.

#### **Time Allocation**

The unit of semester credit is defined as university-level credit that is awarded for the completion of coursework. One credit hour reflects the amount of work represented in the intended learning outcomes and is verified by evidence of student achievement for those learning outcomes. Each credit hour earned at Chaminade University should result in 45 hours of engagement. This equates to one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester, 10 week term, or an equivalent amount of work over a different amount of time. Direct instructor engagement and out-of-class work result in a total student engagement time of 45 hours for one credit.

The minimum 45 hours of engagement per credit hour can be satisfied in fully online, internship, or other specialized courses through several means, including (a) regular online instruction or interaction with the faculty member and fellow students and (b) academic engagement through extensive reading, research, online discussion, online quizzes or exams; instruction, collaborative group work, internships, laboratory work, practica, studio work, and preparation of papers, presentations, or other forms of assessment. This policy is in accordance with federal regulations and regional accrediting agencies.

#### How This Course Meets the Credit Hour Policy

Content and Skills	10 hours
UbD Assignments	47 hours
Teaching Reflection Assignments	15 hours

## **Course Activities**

## **UbD Planning (60% of overall grade)**

Each student will iteratively develop a science-based curriculum product that integrates other elementary-level standards (specifically language arts and mathematics). This product will include learning outcomes, a performance task, assessments, individual lessons, and resources to support various student learning needs. The curriculum product is expected to include knowledge, skills, and dispositions from prerequisite coursework. (CLO2)

### Content & Skills (10% of overall grade)

Students will engage in and with various integrated learning experiences. Students will be assessed on their ability to demonstrate the knowledge and skills associated with those integrated learning activities (i.e., science, mathematics, language arts, social studies, etc.). The content and skills assignments are expected to include knowledge, skills, and dispositions from prerequisite coursework. (CL01)

### **Teaching Reflection Tasks (20 % of overall grade)**

Students will observe integrated elementary-level classroom learning and reflect on various elements of those observations. Teaching reflections are expected to include knowledge, skills, and dispositions from prerequisite coursework. (CLO 1)

## **Communities of Practice (10% of overall grade)**
