

COURSE OUTLINE AND SYLLABUS

TEXT: There is no text for this course. Handouts will be given to supplement lecture materials.

GOALS: The goals of this course are stated below.

1. To learn about the literature of the forensic sciences, such as abstracts and journals and ways to obtain information from the literature.
2. To prepare a bibliography for a research problem or topic.
3. To inform students of ~~career/professional methods~~, such as resumes and financial aid.
5. To prepare an oral presentation, complete with overheads and slides on one aspect of forensic science selected by the student.
6. Give an oral presentation on one aspect of forensic science selected by the student.
7. Expose students to various guest speakers on topics of forensic science.

PROJECTS: To accomplish the above goals, the student will complete the following projects:

1. **Journal Selection and Analysis:** selection of journal in specified fields of forensic science with reasons for selection.
2. **Bibliography:** prepare a bibliography on a topic selected by the students.
3. **Resume Preparation:** preparation of a resume by each student.
