"Amazing! The mummified remains of a prehistoric cave-painter—still clutching his brush! ... Seems he made an enemy, though."

TEXT: "A SURVEY OF WESTERN CIVILIZATION"---volume one/2nd ed

READINGS: SOURCES OF THE WESTERN TRADITION, volume I/3rd edition

MAP(S) OR A GOOD HISTORICAL ATLAS OF THE WORLD HISTORY

COURSE DESCRIPTION:

"Latin is a language, as dead as dead can be. First it killed the Romans; and now it's killing me!"---old limerick

"History is bunk,"---Henry Ford

"American can remember World Series games and records; but they know little of the world's people and how they came to be what they are." ---a Japanese university professor

The story of the human race on the planet from earliest times until the 16th Century is both fascinating and vital. As early humans began to form groups, tribes, and eventually "nations," they sought safety, abilities to grow and store food, religious beliefs and practices and those to lead such, and power. Eventually empires emerged, (larger than a nation, an empire is control of other and far-flung peoples by a different people or nation,) and fell. Early ideas of all the world's great religions and disciples and philosophies and practices were in place by the year 1500 A.D. Notions of power, control, order, democracy, monarchies, and republics were born before the birth of Jesus! Human history is not an orderly progression from "darkness" to order and "light;" but neither is it totally chaotic and irrelevant to the present. **WORLD CIVILIZATION**, rather than earlier limited views oof **WESTERN CIVILIZATION** (still taught at some universities!), leads to recognizing there is one humanity with many variations. **AFTER 1500 AD** the European World began to impact upon the rest of the world, and great exchanges occurred between regions. **BEFORE 1500 AD** the world's regions developed largely independently of each other but with important contacts.
