COURSE OUTLINE - INTRODUCTORY SOCIOLOGY - SO 200 20  
CHAMINADE UNIVERSITY  
Winter 2000 Accelerated Semester

**INSTRUCTOR:** David B. Johnson, Ph.D.  
**TIME/PLACE:** Wed, 5:30PM, MCBH  
**COURSE/TEXT:** SOCIOLOGY: An Introduction by Doob

**COURSE DESCRIPTION:**

Sociology 200 is an introductory course in Sociology which presents sociology as systematic way of learning about human interaction. It shows how groups function in controlling and supporting individual members. It presents social institutions such as the family, religion, politics, education and economic as ways society has to accomplish various important goals such as procreation, nurturance, socialization, learning, creation of values and morals, explanation of the unknown, the distribution of power, the distribution of goods and services, etc. The course also covers how social control and deviation from social expectations effect both the individual and society. The course serves as a basis for further detailed study of topics in sociology and other behavioral sciences.

**COURSE OBJECTIVES/REQUIREMENTS:**

Students are required to read the assigned text chapters. The reading should be completed in advance of each class meeting to allow students to knowledgeably participate in classroom discussions of the assigned topics.

There will be a mid-term examination on the first half of the course materials (see schedule), and there will be a final examination emphasizing the second half of the course materials. Exam questions will include sociological terms defined in the text and will also include some of the special readings questions from the text. In addition, there will be some questions about sociological concepts discussed in the classroom and text. The exams will be take-home with long essay type questions. Exam questions will be evaluated on: completeness, accuracy, creativity, appropriateness and clarity of discussion.

Students will be expected to complete a course project. The project is for the purpose of teaching the student through experience in "doing sociology." The student will select from among several types of projects and topics and will receive guidance from the instructor. The course project will begin at the start of the course and the final written report is due on the last day of class (see schedule). The student is encouraged to consult with the instructor on various phases of the project. The course project includes a written paper of 12-14 pages (double spaced typed). The term papers will be evaluated on: organization, scholarship, creativity, clarity of discussion and appropriateness.

Once students have selected an appropriate topic for the class project, they should discuss the selection with the instructor for approval and suggestions. The instructor will then provide students with guidelines on how to get started and will consult with students on their progress. The course project will be evaluated on: organization, scholarship, accuracy, creativity and completeness.

Students may earn up to 5% of extra credit with a class presentation consisting of an invited guest or video on a topic relevant to the course.

**METHODS OF INSTRUCTION:**

Each unit of the course will utilize a variety of learning techniques to maximize the students' participation and involvement. There will be lecture-discussions on the assigned text chapters, including discussion of sociological terms and concepts. Also, the class will be asked to respond to questions about the assigned readings. There will be periodic discussion in small groups on special topics and issues. An attendance role will be kept to enable the instructor to evaluate student attendance and participation.

**GRADING:**

The course grade will be assigned as follows:

Course project report.	50% of grade
Examinations (25% mid-term + 25% final exam)	50% of grade

NOTE: see syllabus for evaluation criteria for papers and exams.

Attendance will be kept and used to help determine grades when the earned grade lies equally between two grades.

**POLICY ON MAKE-UPS, ATTENDANCE, LATE ASSIGNMENTS:**

The instructor may exact a one-grade penalty for late exams or course projects, depending upon the circumstances. The dates for exams and the due date for the class project are on the class schedule. Students who have difficulty in attending classes or taking exams or completing the course project should discuss their situation with the instructor in advance or as soon as possible to enable the student to meet the course requirements in a timely manner. If for some reason a student is unable to meet all of the course requirements by the end of the term s/he should discuss the situation with the instructor and possibly arrange for an incomplete grade agreement form to be prepared before the end of term, otherwise the final course grade will be determined by those assignments turned in by the end of the term.

SCHEDULE OF COURSE MEETINGS AND SYLLABUS

WEEK	DATE	TOPIC OF CLASS DISCUSSION:	TEXT READING ASSIGNMENT
1	Jan 12	<p><b>INTRODUCTION:</b> This unit introduces the student to sociology as a science of human interaction with an introduction to the principal theories and theorists.</p> <p><b>DOING SOCIOLOGICAL RESEARCH:</b> This unit discusses the science of sociological research and various types of research design.
